

SmartVizor VDP Layout Repetition Setup

SmartVizor VDP has the ability to multiply a 1-up layout to as many repetitions that will fit on the output page. You can also control the output order of the job. A 4" x 5" layout can be setup 4-up (2X2) on a letter size document (8.5" x 11").

To get to the Layout Repetition dialog: 

File -> Print Options -> Repetition Setting

Printer pager size: specifies the size of Horizontal and Vertical paper, you can change via Print Setup command.

Gap Size (Spacing between layouts): specifies the Horizontal and Vertical spacing between each layout.

Priorities: specifies the position and the order of the output on the page

1): Print order through output stack (Z-sort) Priorities set to 1, 2, 3 will print the records vertically through the output stack

2): Print order horizontally (across the sheet) Priorities set to 3, 2, 1 will print the records the records from left to right horizontally across the output page

Mirroring/Duplex Mode: book matches 2-sided documents

1): - Simplex.

2): - Flip on the Edge.

3): - Based on Driver Settings.
